Food Waste Audit - Schools

1. Record how much waste (kgs) your school generates every day.
2. Total your daily amounts at the end of the week.
3. Using the guidelines below, calculate how many buckets/big bins you will need for your recycling project.

Week ended: 26th March 2011

Room/class ID	Kgs per day				
	Monday	Tuesday	Wednesday	Thursday	Friday
Staffroom	2	2	3	2	2
Room 1	1	2	1	1.5	1
Room 5	2	2	1	2	2
Office	0.25	0.5	0.25	0.25	0.5
Daily Office	5.25	6.5	5.25	5.75	5.5
				WEEKLY TOTAL	28.25kgs

SAMPLE

Week ended: _____

Room/class ID	Kgs per day				
	Monday	Tuesday	Wednesday	Thursday	Friday
Daily Office					
				WEEKLY TOTAL	28.25kgs

How many ZingBokashi buckets do you need?

As a guide, we recommend 2 x **15L bucket systems for every 12kgs of waste per week**. So for the sample above, **28.25kgs of waste** would require 4 x 15L bucket systems.
If you are generating more than **25kg waste per day**, contact Bokashi and ask about our Big Bin (140 litre) system, which may be a more cost effective option.

To order your buckets or for further information, please check out our website **www.zingbokashi.co.nz** or contact ZingBokashi on 03 614 8150.
